APPENDIX A - WARRANTY ........................................................................................................................................188
Dear business friends,

We look pleased to welcome you in a group of fishermen who choose to use Reel Master control system for their boats. At the same time we would like to direct your attention to a few points which we believe to be helpful to you.

This manual describes the install of applications and how it is connected to the Jigging reel on the boat. Take your time and read the manual from start to finish. It is our experience that the more time is taken to study the manual, the fewer problems are encountered during the installation of it and the better utilization of all the powerful features of the system has on offer. Even if you do not use all the potential in the beginning, you will know them much easier for you to take advantage of them later when you need them.
Overview

Key features of ReelMaster

Reel Master is designed to relieve the fishermen who use DNG C-6000i reels. It allows you to connect up to 8 winds, monitoring and control from wheelhouse.

A few features of Reel Master are:

- Simple to connect
- Runs on Windows XP, Windows 7 og Windows 8
- Communication between machines

Manual

This handbook is written to serve as a complete guide for the installation and use of the Reel Master for both experienced users and beginners. It comprises the following sections:

INSTALLATION

ADAM-4561

Before the ADAM-4561 USB cable is inserted into your PC, you have to install drivers for ADAM-4561

Perform the following steps.
Step 1: Insert USB to computer
Step 2: Open the folder called "ADAM-4561"
Step 3: double click on the file "CP210x_VCP_Win_XP_S2K3_Vista_7.exe"
Step 4: Click "Next" to continue the installation.

Step 5: Follow the instructions to the setup window below. Check "Launch the CP210x VCP Driver Installer" and click "Finish" to start installation of the driver.
Step 6: Click "Install" to continue the installation.

Step 7: Click "OK" to finish the installation.

Step 8: Plug the ADAM-4561 to USB port and driver will be installed automatically.
To start you need to connect the communication wires together. All the brown wires together and all the blue wires together. Then best to run shielded 2 wire communication cable to the ADAM-4561 and connect as shown.
Before starting the installation of drivers for Keylok needs to ensure that keylok usb not connected to your computer.

On the USB is a folder called "Keylok" and inside is a file called "install.exe" double click on it then appears that window.

Make sure that is check to „KEYLOK 2 (USB w/Driver)” and „Standalone”

When this window appears then press „OK”

Once checking in the two place then you need to press the "Begin Install" and after a while that window should come

When that window comes up then press "Close"
Then this window will pop up. 
Press „Next“

When this pop up press „Install“

And when this window pop up press „Finish“

Insert Keylok USB to the computer and then it should all set up automatically
ReelMaster

Uppsetning á Reelmaster

On your USB is folder called „ReelMaster“ inside it is a file named „setup.exe“ double click on it
